EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Frederick Bailey on September 14, 2005.

The application has been amended as follows:

In claim 1 at line 13, insert "selection" between "the" and "method".

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The applicant's invention calls for a database defining the relationships among disk volumes to be backed up, the available backup methods for the disk volumes, state information of the disk volumes, and the conditions to be met for a particular backup method to be selected for a particular disk volume. By narrowing down the available backup methods for a disk volume to be backed up according to the state information of the disk volume, a backup method that meets the user needs can be selected for that disk volume. Furthermore, the prior art of record does not teach or suggest a backup method selection method using a computer, a computer, or a storage medium containing a program for causing a computer to: judge whether state information stored in the second

table in a correspondence manner to the first volume name has been updated; extract the updated state information when the state information is judged to have been updated; extract a first backup method identifier and a second backup method identifier from backup identifiers stored in the third table; store the first backup method identifier in the first table in a correspondence manner to the first volume name when the extracted state information satisfies a first condition stored in the third table in a correspondence manner to the extracted first backup method identifier; and store the second backup method identifier in the first table in a corresponding manner to the first volume name when the extracted state information satisfies a second condition stored in the third table in a correspondence manner to the extracted second backup method identifier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shawn Gu whose telephone number is (571) 272-0703. The examiner can normally be reached on 9am-5pm, Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mano Padmanabhan can be reached on (571)272-4210. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
